

Yukon Area Moose Hunt

This camp has an enviable record of success since its establishment in 1997. Trophy quality has been outstanding. In 1998, the new # 4 B&C trophy moose was taken from this camp. This area also has a very good number of grizzly & black bears, making it a great spot for a trophy moose & grizzly bear, black bear or wolf combination hunt.

We are proud to be able to offer our clients an opportunity to experience what we believe to be some of Alaska's best moose hunting. We provide our clients with the very best wilderness hunting experience that Alaska has to offer. We are delighted with this area, and know that we can provide the trophy moose hunter with a hunt of a lifetime.

Taking two trophies on a hunt has real advantages for many hunters, especially those who can ill afford the time required for several single species hunts. Somehow taking more than one animal on a hunt seems to bring more pleasure than the sum of the individual parts. Whatever the reason, successful multi-species hunts are inordinately enjoyable and actually quite practical in this area. It is even possible to take two or three species on a 10-day hunt.

During the fall seasons there is no trophy fee charged if you shoot a wolf, but State law requires you to have a tag in your possession at the time of harvest. I suggest purchasing a wolf tag. The cost has been reduced dramatically, to just \$30, so there is really no reason not to have a tag available.

For grizzly & black bears we do charge a trophy fee, but only when an animal is taken. State law requires you to have a tag in your possession at the time of harvest. The purchasing of these tags is a choice you must make. I suggest purchasing these tags if you have any desire in taking one of these trophies.
