

An Overview of Hunting Opportunities

Thanks for your inquiry about a trip with Deltana Outfitters. Alaska offers unique hunting opportunities not found elsewhere in the world. Deltana Outfitters offers hunting trips for Dall sheep, moose, caribou & brown bear. These hunts are conducted from several geographically different areas. We have several different areas that are **EXCLUSIVE federally permitted concessions hunting areas within National Wildlife Refuges**. In these areas you never compete with other guides and outfitters. The only hunters you will see in these areas are our clients. This is a major benefit that few guides can offer their clients and few hunters can ever enjoy.

Deltana Outfitters' main brown bear camp is on an **EXCLUSIVE permitted fFederal concession within the Izembek National Wildlife Refuge** located on the Alaska Peninsula, Alaska's fabled home of the largest Brown Bears in the world, within the famous and productive Game Management Unit 9. In this area one thing is beyond question; the Alaska Peninsula has been producing the largest hides and largest skull sizes in Alaska over the last 20 years.

Interested in a thrilling Dall sheep hunt? Our sheep camp is located in Alaska's fabled Brooks Range. This area is **EXCLUSIVE federally permitted lands within the Arctic National Wildlife Refuge**. I have yet to find a location with more game and fewer hunters than these magnificent valleys. The Brooks Range is as true a wilderness as there is anywhere on this continent and unlike any I have ever known.

We also hunt caribou in the Brooks Range. Two caribou herds are present in the area we hunt; both are sizable, numbering into the hundreds of thousands of animals. Both herds reside in the area year round. If you would like to introduce your son or daughter to hunting, an early August caribou hunt is an unsurpassed value for a **father/son** or **father/daughter** combination. Why not spend some time with your child in the Arctic? They will never forget it.

Our moose camp has the enviable record of nearly 98% success most years since its establishment in 1997. Trophy quality has been outstanding with an average of nearly 62 inches most years. In 1998, the new #4 B & C trophy moose was taken from this camp. This area also has a very good number of grizzly & black bears, making it a great spot for trophy moose & bear combination hunt.
